R

DESCRIPTIVE
CATALOGUE
OF THE
STOCK OF
ORCHIDS

HELD BY

MESSRS. CHARLESWORTH & Co.,

HEATON,

BRADFORD, YORKS.

MO. BOT. GARDEN
1911

The Plants are on Sale on receipt of Catalogue and can be seen at any time.

Plants delivered immediately on receipt of order subject to being unsold.

All orders will be taken in strict rotation.

All plants GUARANTEED TRUE TO NAME and description; should any customer on receipt of plants ordered be in any way dissatisfied the plants may be returned to us.

If by accident any plant flowers untrue to description the money will be refunded, with 5% interest added, and no further claim admitted.

The Paintings of several of the very choice plants can be seen on application.

In sending, order by post or telegram, it will be sufficient to quote numbers in catalogue.

Telegraphic Address: "CHARLESWORTH, HEATON, BRADFORD."

Cable Address: "FLORA, BRADFORD."

Tram Cars starting from Darley Street, Bradford, run every five minutes to Victor Road, Manningham; our Nursery is about six minutes' walk from this terminus.

INTRODUCTION.

Feeling that the Catalogue usually published by Orchid Importers and growers gives very little idea to intending purchasers of the size, variety, or condition of the plants offered, we have determined to Catalogue our Stock in such a clear and comprehensive manner, that no one can fail to judge what they are purchasing.

To do this, we only catalogue the plants we have actually in our houses. This is not a list of plants in cultivation, or that can be procured to order, but every plant described, can be seen on a visit to our Nursery.

Another reason for issuing this Catalogue is, that our Nursery being situated somewhat out of the great Central Railway Routes, we find that our patrons and friends do not find it convenient to visit us as often as we should wish, so have decided to place our stock as clearly as possible before them.

For years we have been collecting from all sources, many rare, curious, and beautiful species that are not easily procured, and it now pleases us to be able to offer these plants to our patrons.

Our General Collection embraces many beautiful examples of Exhibition Plants, along with a variety of the choicest, rarest, and most recent novelties, too numerous to mention here, but which are fully described.

We may say, without fear of contradiction, that our plants are in the best possible health and condition, as we spare no expense or labour in their cultivation. All our houses are models of what orchid and plant houses should be; every visitor will verify these statements.

As this Catalogue will take some considerable time in preparation, a few of the plants—which are rapidly growing—may be slightly different when finished; but we only describe sheaths and spikes where they are now visible, so that there will be more, rather than less on them when completed.

The prices placed upon the plants are exceedingly low, and it must be understood, apply only to our present stock, as we are sure they will give satisfaction to the most fastidious.

We wish to clear out a large quantity of plants to make room for next year's importations, and for the additional room for our seedlings, which now commence to occupy a large space.

DESCRIPTIVE CATALOGUE.

We do not think we shall be far wrong in saying “that a finer lot of *Calanthes*, as regards culture and choice varieties, has never been placed before the orchid-loving public.” Some of these choice varieties have never before been placed on the market. They were purchased from one of the finest collections in England, and we have no hesitation in recommending them as the finest varieties in cultivation.

GUARANTEED AUREA, OR HYBRIDS.

ESTABLISHED. UNFLOWERED.

It is a well-known fact that the most choice and costly varieties of this lovely *Cattleya* have been purchased from our importations, amongst the most noted may be mentioned

CATTELEYA HARDYANA, WILSONII, CATTELEYA HARDYANA, HOWICK HOUSE VARIETY,

(the latter sold by auction for 95 guineas)

CATTELEYA HARDYANA, SELWOODENSE

(sold for 140 guineas), the priceless

CATTELEYA, COUNTESS OF DERBY,

Which the Royal Horticultural Society awarded a Gold Medal;

CATTELEYA HARDYANA, ALBA,

Flowered by W. S. McMillan, Esq., Maghull, Liverpool,

Besides no less than three beautiful forms flowered by J. Leeman, Esq., Heaton Mersey, all of them receiving a First-Class Certificate, Manchester Orchid Society.

This should be sufficient evidence as to the quality of our strain, and although collected in the centre of the *Cattleya Gigas* District, WE GUARANTEE EVERY PLANT TO BE AUREA OR HYBRID.

Nos.

204	Cattleya Bowringiana	LILACINA. A beautiful form, the whole flower being suffused with a soft lilac colour, giving it a charming appearance. Good plant, 8 bulbs, 5 leaves, 2 leads	2	2	0
205	„	Fine Variety. Magnificent plant, 8 extraordinary fine bulbs, 6 leaves, 2 flower sheaths, 2 extra strong leads	3	3	0
206	„	„ Magnificent plant, 7 extraordinary fine bulbs, all leaved, 1 extra strong lead and flower sheath	2	12	6
207	„	BRYMERIANA. A very rare and handsome natural hybrid, between <i>C. superba</i> and <i>C. eldorado</i> . The sepals and petals mostly resemble those of <i>Catt. superba</i> , but the lip is more open, rather obscurely three-lobed, and the throat light yellow in front, and nearly white at the sides, in which respect it approaches <i>C. eldorado</i> , the other parent. Strong plant, 6 bulbs, 5 short thick leaves, 1 strong lead... ..	6	6	0
208	„	CALUMMATA. Painting can be seen on application. A beautiful and distinct hybrid, a cross between <i>C. amethystina</i> and <i>C. Acklandiae</i> . Sepals and petals blush white, spotted with violet and purple, as in <i>amethystoglossa</i> ; lip rich violet purple in the centre, passing to a lighter tint of the same colour on either side. Good plant, 6 bulbs, all leaves, pushing young growth	10	10	0
209	„	„ SUPERBA. A most superior form of the above, the colour and markings are most intense. Good plant, 7 bulbs, 6 leaves, 1 strong lead	12	12	0
210	„	chocoensis. A beautiful sweet scented species. Very fine plant, 14 fine bulbs, 8 leaves, 2 strong leads and 2 flower sheaths	1	15	0
211	„	crispa. Magnificent plant, 21 extra fine bulbs, 15 leaves, 4 extra strong leads	1	1	0

230	" FERDINAND DENIS.	This fine hybrid received a First-class Certificate, Temple Show, 1898. One of the most striking plants exhibited, and which attracted universal attention. The flowers show clearly its parentage (C. Gigas and C. Acklandiae) and the glowing colour of the lip, is most pleasing. The sepals and petals are slightly spotted at their extremities, as might be expected from a hybrid from Acklandiae.	Size and price on application

377	„ „	Five very fine plants, 5 to 7 specially fine large bulbs, 4 and 5 leaves, 1 extra strong lead and flower sheath each	0	10	6

The following are a superb batch of plants, in the best possible condition, imported at the end of last year and beginning of this year, from the finest district. The plants have done exceedingly well, and we are sure a finer lot of plants have never been placed upon the market, and from what our collector says about them, some marvellous forms will be found amongst them.

We have endeavoured to describe the plants, to represent them at the time of making Catalogue, however, many of the growths, which are not stated to have flower sheaths, will in the meantime, push them through; this will be to purchaser's advantage.

378	Cattleya MENDELII. Unflowered.	Perfect model plant, very distinct looking, 8 fine large bulbs, 3 short thick leaves, 3 most extraordinary vigorous growths and 2 flower sheaths	4	4	0

We beg to call special attention to the splendid lot of plants, all of which are unflowered, and are models of cultivation. They were collected by one of our most experienced men, and are the fine old type of *Cattleya Trianae*, with the broad sepals and petals, and beautiful round flowers. We recommend these plants with the greatest confidence, and are positive that they will give every satisfaction.

1854	GONGORA CHARLESWORTHII.	This charming Gongora was introduced by us from Peru, and named in honour of our Mr. J. Charlesworth. In habit it is somewhat like <i>Gongora truncata</i> . The leaves are broadly lanceolate, plicate, about 10 inches long, and 2 to 2½ inches broad. Scape arching, from 20 to 40 inches long, and bears from 40 to 80 flowers. Sepals and petals are rosy pink, barred and spotted with bright purplish red of a peculiar shade; lip and column of a brownish purple shade. Grand plant, 7 very strong bulbs, and 2 strong leads	2	2	0
1855	Grammatophyllum. Fenzlianum.	Good plant, 10 bulbs, 5 young growths	1	1	0

1856	Grammatophyllum SPECIOSUM.	An exceedingly rare and handsome Orchid, a plant of which was exhibited at the Drill Hall, August 24th, 1897. In the report of the meeting the "Gardener's Chronicle" says: "A first-class certificate was unanimously awarded to Grammatophyllum Speciosum, a spike (upwards of 7 feet in length) which was shown by Sir Trevor Lawrence (gardener, Mr. W. H. White). The flowers are yellow, spotted chocolate or reddish purple. A gold medal was deservedly awarded it, in addition to the first-class certificate." Magnificent vigorous plant, 3 tremendous strong growths, measuring 4, 5, and 5½ feet, and still growing strong	10	10	0

2026	„ „	ALBA. The following are exceptional fine forms of this choice variety, having pure white sepals and petals and a very highly-coloured lip. These have been selected from large importations. Magnificent plant, 17 strong bulbs, 12 leaves, 3 very strong new growths	4	4	0

2042	Lælia purpurata CHARLESWORTHII.	Painting can be seen on application. Probably the finest <i>L. purpurata</i> seen. The flower is of a beautiful shape and of medium size, and good substance, sepals and petals snow-white, lip white, the whole of the open portion covered with the most brilliant magenta-purple, extending over a portion of the tube; the apex white partly veined and margined with magenta-purple; throat soft canary-yellow, distinctly lined with magenta-purple. Very fine plant, 3 bulbs, all leaved, 1 strong young growth 52 10 0
2043	„ „ FULGENS.	Exceedingly dark lip; lines running to the throat; dark rosy sepals and petals. Superb plant, 5 strong bulbs, all leaved, making 1 exceptional strong growth in sheath 15 15 0
2044	„ „ „	Magnificent plant, 8 bulbs, 6 leaves, 1 extra strong growth in sheath 10 10 0
2045	„ „ FASTUOSA (Rolfe).	Portion of the original plant. A very handsome form. The sepals and petals are broad and well formed, and of a bright rose tint, the latter being much darker in their upper half and along the centre nerves. The well formed lip is deep crimson-maroon tipped with lilac, and the throat white. It is very distinct and handsome. This variety is figured in the "Lindenia" August number, 1893. Fine plant, 5 bulbs, 4 of them with leaves, pushing 2 strong young growths 31 10 0
2046	„ „ „	Fine plant, 5 bulbs, 4 of them with leaves, pushing 1 strong young growth 26 5 0
2047	„ „ GLORIOSA.	A glorious form, sepals and petals almost white, lip very fine, with dark velvety purple front and soft purple lines running to the front. Superb plant, 10 strong bulbs, 8 leaves, 2 strong young growths, 1 already in sheath 10 10 0
2048	„ „ „	Same variety. Good plant, 5 bulbs, 3 leaves, 1 strong lead in sheath 5 5 0
2049	„ „ ILLUMINATA.	Painting can be seen on application. A very fine form; flower large, of good shape and substance; sepals and petals white, suffused with rose; lip exceedingly large, covered with a deep crimson maroon; throat, canary yellow, clearly lined with maroon-crimson. Superb plant, 7 extra strong bulbs, 6 leaves, 1 exceptional strong growth, sure to flower 15 15 0
2050	„ „ MAGNIFICA.	Grand variety, very broad sepals and petals, very dark and fine lip. Superb plant, 7 extra strong bulbs, 6 leaves, making 2 exceptional strong growths, sure to flower 7 7 0
2051	„ „ „	Very fine and bright. Grand plant, 10 bulbs, 6 leaves, 2 extra strong growths 4 4 0
2052	„ „ LITTLEIANA.	A handsome form, flower of medium size, pure white, with 2 small blotches of violet purple on each side of the lip in front. Very good plant, 3 bulbs, all leaved, making strong young growth 12 12 0

Nos.				£	s.	d.
2053	Lælia purpurata	PICTA.	Superb variety, sepals and petals pure white, lip white, 2 deep purple blotches on the sides, splendid plant, 20 strong bulbs, 13 leaves, making 3 strong new growths	15	15	0
2054	„ „ „		Fine plant, 6 bulbs, 3 leaves, making 1 very strong new growth	5	5	0

3 very fine bulbs, all leaved, 1 exceptional strong
new growth, sure to flower 26 5 0

„ **TENE BROSA.** See *Lælia grandis tenebrosa*.

2069 **Lælio-Cattleya ADMIRAL DEWEY.** Painting can be
seen on application. The following description of this fine
hybrid is given in the "Gardeners' Magazine" Aug. 6th, 1898:—
"This is a particularly robust hybrid orchid, and one that
combines freedom of flowering and great beauty with its vigor-
ous habit. The parents of L.c. Admiral Dewey are a very fine
form of the bold *Cattleya Warneri* and *Lælio-cattleya elegans*
Mastersi. A glance at the accompanying illustration will
prove, however, that *Lælia purpurata* has exercised consider-
able influence on this, one of its grandchildren. The lip has
been glorified and the petals broadened by the influence of
Cattleya Warneri, and the flowers have an erect poise that is
doubtless due to it. The plant was a great attraction at the
Temple Show of May last, and made a splendid centrepiece to
the group of beautiful orchids staged by Messrs. Charlesworth
and Co., Heaton, Bradford, a firm that has raised and introduced
a number of charming hybrid orchids. The sepals and petals
are of a beautiful shade of light purplish rose, the sepals being
narrower and lighter in colour than the wavy petals. The tube
of the lip is very broad, bright rose-purple, with darker veins;
inside there are two light creamy patches on either side of a
central band of royal purple. The mouth of the lip is fully
two and a-quarter inches across, rounded, with waved and
crisp margin, and of a grand rich red-purple colour, though
with a lighter wire edge. Four flowers were borne upon the
spike shown, and each bloom was over six inches across
without stretching out the segments. The hybrid thoroughly
merited the first-class certificate awarded it by the Orchid
Committee of the Royal Horticultural Society. Magnificent
plant, 5 extra fine bulbs, all leaved 1 exceptional strong new
growth Prices on application

2070 „ **ALBANENSE.** A fine natural hybrid, probably between
Catt. Warnerii and *Lælia grandis*. Flowers are 5 inches
in diameter; sepals and petals light rosy-mauve; the front
lobe of lip rosy-crimson and the disc purple-crimson, with
similar coloured veins extending toward the rosy-lilac margin.
Healthy plant, 1 old bulb, 2 new bulbs, with leaves, making
strong new growth, bulb and leaf measuring 10 inches ... 7 7 0

2071 „ **ARNOLDIANA** (*L. purpurata* x *C. labiata*). Fine variety.
A superb hybrid, sepals and petals pale rose, suffused with
purple-rose and very broad, and having a medium line of rosy-
purple; lip large, front lobe deep rosy-purple, veined with
deep purple; throat yellow, with radiating maroon veins.
Grand plant, 4 fine bulbs, 3 leaved, strong new growth ... 31 10 0

2072 „ **ANDREANA** (*Catt. bicolor* x *L. elegans*). A pretty hybrid;
flowers are larger than *Catt. bicolor*, with creamy-rose
sepals and petals; the middle lobe of the lip rather long,
of a pretty magenta-colour. Magnificent plant, 6 gigantic
bulbs, 4 leaves, 1 lead 3 3 0

Nos.			£	s.	d.
2073		Lælio-Cattleya ANDREANA. Nice plant, 3 bulbs, 2 leaves, 1 lead 0 15 0			
2074	„	ADOLPHUS (<i>Catt. Acklandiæ</i> x <i>L. cinnabarina</i>). Painting can be seen on application. An exceedingly pretty hybrid, recently raised by us. The flowers are about $4\frac{1}{2}$ inches across, 3 and 4 borne on a spike, sepals and petals of a brilliant cinnamon-orange; spotted towards the apex with violet-crimson dots; lip spreading in front, and of a purple-crimson colour, the diskal part whitish, marked with crimson veins. Grand plant, 4 very fine bulbs, all with leaves, longest bulb and leaf $10\frac{1}{2}$ inches long 15 15 0			
2075	„	AURORA (<i>L. Dayana</i> x <i>Catt. Loddigesii</i>). A nice combination; sepals and petals are light rosy purple; the anterior portion of the lip deep rosy purple, with a pretty yellow throat. Grand plant, 3 very strong bulbs, all leaved, making 2 exceptional strong new growths... .. 4 4 0			
2076	„	„ Very fine plant, 6 bulbs, 5 leaves, 1 strong lead 3 3 0

2078	„	CALLISTOGLOSSA (<i>L. purpurata</i> x <i>Cattleya Gigas</i>). Painting can be seen on application. This is an exceptional fine form of this lovely hybrid, raised from two superior parents. Flowers are immense, measuring 9 inches in diameter; sepals and petals of bright rose and wavy; lip enormous, very rich magenta; throat orange, veined with reddish purple. Grand plant, 6 exceptional fine bulbs, all leaved, longest bulb and leaf measuring 17 inches, 2 very strong leads 18 18 0			
2079	„	„ Magnificent plant, 5 exceptional fine bulbs, all leaved, 1 strong lead, longest bulb and leaf measuring 22 inches 15 15 0			
2080	„	„ Very fine plant, 6 bulbs, all of them leaved, 1 strong lead, longest bulb and leaf measuring 21 inches 10 10 0			
2081	„	CANHAMIANA (<i>L. purpurata</i> x <i>Catt. Mossiæ</i>). A fine hybrid, very intermediate in character; sepals and petals white, flushed with pale rose purple; petals broad; the anterior portion of the lip is stained with the richest purple, with a narrow white, slightly crisped margin; throat orange yellow, streaked with purple. Very fine plant, 4 good bulbs, 3 leaves, 1 strong new growth, longest bulb and leaf measuring 19 inches 10 10 0			
2082	„	CORBEILLENSE (<i>L. præstans</i> x <i>Catt. Loddigesii</i>). A pretty hybrid; sepals and petals bright rose purple; lip of the same colour, front lobe stained with crimson purple, throat white. Two very fine plants, 9 fine bulbs, 8 leaves, 1 strong lead each 1 5 0			
2083	„	„ Nice plant, 7 bulbs, all leaved, 1 lead... .. 0 15 0			
2084	„	SUPERBA. An exceedingly fine variety. Magnificent plant, 10 extra fine bulbs, all leaved, 1 strong lead and flower sheath 5 5 0			
2085	„	„ Same variety. Grand plant, 6 grand bulbs, all leaved, 1 strong lead 6 6 0			
2086	„	„ Nice plant, 5 bulbs, 4 leaves, 1 lead 1 5 0			

Nos.			£	s.	d.
2037		Lælio-Cattleya CLIVE (<i>Lælia Dayana</i> x <i>Cattleya Dowiana aurea</i>). An exceedingly rare and handsome hybrid; sepals and petals, bright rosy purple; the peculiarly-formed lip, which is nearly 3 inches broad, is of a bright tint of purple, with lilac apex, and orange and brown markings in the base and middle area. Velvety in texture. The flowers have the fragrance of the rose. Nice propagated plant, 1 bulb without leaf $3\frac{1}{2}$ inches, and 1 bulb with leaf $2\frac{3}{4}$ inches and making nice young growth 7 7 0			
2089	„	EUDORA (<i>Lælia purpurata</i> x <i>Cattleya Mendelii</i>). A beautiful hybrid, producing a fine flower, of good formation and substance, as one might expect from this parentage. Sepals and petals white, heavily suffused with rosy-purple; lip of the same colour, with the front lobe of the richest crimson-purple. A fine acquisition. Magnificent plant, 9 exceptional fine bulbs, all leaved, 2 exceptional strong growths 47 5 0			
2090	„	„ Portion of above. Nice plant, 3 nice bulbs, 2 leaves, 1 new growth 10 10 0			
2091	„	HENRY GREENWOOD . Painting can be seen on application. A magnificent hybrid, a cross between <i>L. elegans Stelzneriana</i> x <i>Catt. Hardyana</i> . Flowers are as large as a good <i>Catt. Gigas</i> and quite novel in form, especially the showy labellum. Sepals and petals white, heavily tinted with rose, the fine lip is of chrome-yellow in the throat and rich purple-crimson. This hybrid received the highest award at the recent Great Quinquennial Show, where it created a great sensation. Beautiful plant, 5 exceptional fine bulbs, all leaved, and 1 strong lead, sure to flower. Price on application.			
2092	„	IOLANTHE . Painting can be seen on application. A magnificent hybrid, between <i>Cattleya Mossiae grandis</i> and <i>Lælia purpurata</i> . Sepals and petals flushed, grand oblong lip of abnormal size, bright cerise, margined with white, yellow blotches on the convolute limb, and bright purple lines running up to the base of column. First class Certificate Manchester, 1897. Very fine plant, 6 fine bulbs, 5 leaves, longest bulb and leaf 17 inches, making strong new growth, sure to flower 21 0 0			
2093	„	„ Fine plant, 3 strong bulbs, all leaved, and strong new growth 12 12 0			
2094	„	INTERMEDIO-CINNABARINA . Painting can be seen on application. A pretty hybrid. Flower very intermediate both in shape and colour; sepals and petals white, with a deep suffusion of rose; lip whitish, the anterior portion being deeply stained with crimson-purple; throat white, stained with yellow. Fine plant, 4 bulbs, all leaved, longest bulb and leaf 10 inches, 1 strong lead 3 3 0			
2095	„	INTERMEDIO-FLAVA . First Class Certificate Paris, 1897. A pleasing hybrid between <i>Cattleya Intermedia</i> x <i>Lælia Flava</i> . The flowers are very intermediate in character. Sepals and petals creamy white; the front lobe of lip is creamy-white, striately marked with magenta rose. The plants bear 3 to 6 flowers on a spike. Two superb plants, 6 bulbs, 5 leaves, 1 strong growth in bud at present, longest bulb and leaf each 1 11 6

2098	„	LADY WIGAN. Painting can be seen on application. The "Gardener's Magazine," June 5th, 1897. Extract. "Undoubtedly this was the finest hybrid in the Temple Show, and possibly the most interesting orchid. The flowers are very handsome, three large ones being produced on a stout spike. The sepals and petals are of a delicate blush shade, the latter being very broad and slightly drooping; all these segments measured 4 inches in length. The big labellum has a creamy white tube, and a blush white spreading apex, measuring two inches and a half across. The throat is pale yellow, while in front are a number of rays of deep violet-purple that are finely shown up on the pale and delicate ground colour; the violet-purple rays shade into crimson where they reach the yellow throat. This fine hybrid is the result of a cross between <i>Lælia purpurata</i> Russelliana with <i>Cattleya Mossiae</i> aurea. First Class Certificate Temple and Manchester Show, 1897. Magnificent plant, 7 extra fine bulbs, all leaved, longest bulb and leaf 16 inches, strong new growth, sure to flower Price on application			
2099	„ „	Cambridge Lodge Variety. A very distinct form of this fine hybrid, the colouration of the lip being somewhat darker. Fine plant, 4 very fine bulbs, all leaved, longest bulb and leaf measuring 15 inches, very strong new growth, sure to flower Price on application			
2100	„	MARSEILLENSE (<i>Catt. Trianae</i> x <i>Catt. aurca</i> ?) A superb hybrid in every respect, although we cannot quite confirm the parentage; flower is large and of good substance, sepals and petals light rosy-lilac; the disc of lip yellow, with numerous purple lines behind, rich amethyst purple in the front lobe and apex of side lobe. Superb plant, 4 specially fine strong bulbs, all leaved, longest bulb and leaf 14 inches, making extra strong new growth with flower sheath	10	10	0
2101	„	OPHELIA (<i>Catt. Bowringiana</i> x <i>L. elegans</i>). A handsome hybrid between the above parents, and combining the beauties of both in a very pretty manner. Superb plant, 6 fine bulbs, 5 leaves, longest bulb and leaf 15½ inches, 1 strong lead and flower sheath	12	12	0
2102	„	PHOEBE (<i>Cattleya Mossiae</i> x <i>Lælia cinnabarina</i>). Very pretty yellow variety. A most beautiful hybrid, sepals and petals are of a rich Indian yellow, the anterior lobe of the lip being of a rich purplish crimson. Magnificent plant, 4 exceptional fine bulbs, all leaved, longest bulb and leaf 16½ inches, making 2 exceptional strong new growths and flower sheaths. Price on application			
2103	„	RADIATA. (<i>L. purpurata</i> x <i>Catt. nobilior</i>). A fine hybrid; flowers intermediate, borne 2 and 3 on a spike; 5 inches in diameter; sepals and petals lilac-mauve; lip deep mauve, with radiating lines of dark purplish mauve. Superb plant, 9 exceptional strong bulbs, all leaved, 2 very strong growths, 1 flower sheath, already showing... ..	8	8	0

2108	„ „	MAGNIFICA. This is undoubtedly the finest variety ever seen, and immensely superior to any other. Model specimen, 10 gigantic bulbs, all with leaves, 2 strong leads and 2 strong flower sheaths, longest bulb and leaf 25 inches 12 12 0	12	12	0
2109	„ TRESEDERIANA.	A pretty hybrid between <i>Lælia crispa</i> x <i>Cat. Loddigesii</i> . The sepals and petals are of an exquisite light rose colour, lip tri-lobed, the middle lobe is deep rose-coloured, covered with dark purple reticulations; throat yellow, with a few light purple veins. Splendid plant, 8 fine bulbs all leaved, 1 strong lead and flower sheath 4 4 0	4	4	0
2110	„ VELUTINO-ELEGANS.	Described "Orchid Review," Vol. 4, page 325. A pretty hybrid derived from <i>Cattleya velutina</i> and <i>Lælio-Cattleya elegans</i> , and which recently received a First-Class Certificate at Paris. At present it most resembles the mother plant, though rather stouter in habit. The flowers are fragrant, and are produced several together in an erect raceme, the sepals being creamy white, tinged with nankeen yellow, and veined with rose, and the lip blush white at the base, with the front lobe rich crimson-purple, veined with white, and having an orange blotch at the base. Superb plant, 7 very fine bulbs, all leaved, longest bulb and leaf measuring 23½ inches, 1 strong lead 3 3 0	3	3	0

2502	„ „	Same variety. Good plant, 4 bulbs, with leaves, making strong new growth 0 15 0	0	15	0
2503	„ „	HEATONENSE. Painting can be seen on applica- tion. One of the best crispums we have flowered. Flowers of medium size, round, with toothed edges: white sepals and petals, heavily blotched with bright carmine red; crest of lip yellow, with a large blotch of carmine red and a few spots of the same colour towards the apex. It is one of the most pleasing of the spotted forms. Good plant, 5 fine bulbs, 1 with leaves, 1 strong new growth 52 10 0	52	10	0
2504	„ „	MAGNIFICUM. Perhaps one of the largest and finest formed crispum ever seen. The flowers are excep- tional large and of great substance, white, sepals and petals very broad and densely frilled; lip large and beautifully frilled, with an exceptional large crest of bright yellow, front of lip has a large blotch of carmine with a few smaller spots. Magnificent plant, 3 gigantic bulbs, all with leaves, 1 strong lead, and pushing strong flower spike 36 15 0	36	15	0
2505	„ „	ROSEUM. Magnificent plant and very fine variety. 6 gigantic bulbs, 2 with leaves, exceptional strong new growth 1 4 0	1	4	0
2506	„ „	„ Grand plant, 6 fine bulbs, 2 with leaves, 1 strong new growth 1 5 0	1	5	0
2507	„ „	PUNCTATUM. Flowers white, slightly suffused with rose; blotched on sepals and lip with rose purple; the petals being minutely dotted with the same colour. Very handsome. Good plant, with 5 bulbs, 2 of them with leaves, 1 young growth 10 10 0	10	10	0

2508		Odontoglossum CRISPUM STEVENSII.	The original plant. One of the finest spotted forms, with noble flowers, 3 inches across; the sepals and petals are white, very heavily spotted and blotched with bright cinnamon brown; lip is also similarly spotted, the orange stain on the disc being very prominent. It is one of the finest forms yet seen. Very fine plant, 6 fine bulbs, 5 with leaves, 2 strong leads, pushing strong new growth and 1 flower spike			
					Price on application	
2509	„ „	TRIANÆ.	A superb variety with very large flowers; sepals are white shaded with rose; the dorsal one having a large single spot of red in the centre, while the lateral ones have each 3 such spots, with a batch of smaller spots of bright rose on their outer halves; petals are white, very broad, toothed and wavy; lip is broad and has the usual yellow disc, with a large blotch of copper-red in the centre, and smaller spots on the upper margin. Fine plant, 3 fine bulbs, 1 with leaves, 1 strong young growth	5	5	0
2510	„ „	VIRGINALE.	Grand plant, 4 enormous bulbs, 1 with leaves, 1 strong young growth	2	12	6

2701	„ „ IMPERIALE.	The finest of all the type. Flowers are much larger than the type; sepals and petals profusely blotched and spotted with rich dark red, lip very broad, bearing a heavy blotch of chestnut red. A superb form. Magnificent plant, 5 exceptional fine bulbs, 2 with leaves, and making extra strong young growth	10	10	0
2702	„ Schroderianum.	Good plant, 4 nice bulbs, and 1 lead	1	5	0
2703	„ STAR OF HEATON.	Painting can be seen on application. An exceedingly choice form; evidently a natural hybrid; it is however so distinct, that we are unable to say with confidence what the parentage may be. Flower are medium size, very round, the sepals being almost as broad as the petals; the ground colour white very faintly suffused with rose purple; sepals have one large blotch of chestnut red, with 3 or 4 smaller blotches towards the base; surrounded by numerous spots of the same colour, with an entire margin of spots under the surface; petals have 1 and 5 large blotches with the entire surface covered with numerous smaller blotches; margined with the same clouded spotting as in the sepals; lip white, with a large central blotch, and a basal margin of small spots; disc yellowish, profusely spotted; column white with 3 blotches of a slightly darker red. The whole flower has a chaste and handsome appearance. Beautiful plant, 6 good bulbs, 2 with leaves, making very strong young growth			
		Price on application

2731	..	LEOPOLDII. Painting can be seen on application. The Finest Form. A remarkable handsome variety, flowers large and of perfect shape; sepals and petals of a deep rose-pink, with a soft suffusion of white; lip is of a deeper rose pink, with still deeper veins; and a large dark crimson-maroon blotch of triangular shape at the base of the lip. Grand plant, 2 exceptional strong bulbs, both with leaves, 1 strong lead. Price on application			
2732	..	MIRABILIS. Painting can be seen on application. An exceedingly handsome, large, dark coloured variety; the two lateral sepals have two crimson stripes at their base, about $\frac{1}{2}$ inch long; lip deep rose pink, with a small area of white at base, merging into a soft yellow towards the disc; 8 or 9 distinct lines of reddish-crimson running through the white. Good plant, 3 bulbs, 1 with leaves, making 2 new growths	3	3	0
2733	..	SUPERBUM. A variety of extreme beauty, although the flowers are only of medium size; the colour is intensely brilliant, compensating for the lack of size; sepals and petals rosy-purple; labellum bright magenta-rose, and in the white area at the base is a triangular dark port-wine-coloured blotch, veined with radiating lines of a darker tint. Nice plant, 2 bulbs, both with leaves, making strong young growth	3	3	0

2734	Odontoglossum VUYLSTEKEANUM.	A grand thing; the albino of the luteo-purpureum section. The whole flower is of a pale sulphur-yellow, with a few blotches on the sepals, petals, and lip of the richest dazzling orange. Grand plant, plant, 3 gigantic bulbs, and 1 young growth Price on application			
2735	„ WILCKEANUM.	Flowers are about 3½ inches across, the sepals pale yellow with sundry blotches of light brown; petals broader, much serrated at the edges and of the same yellow colour, but with fewer and smaller brown blotches; lip is still paler yellow and has in front a roundish oblong blotch of pale brown; disc is deep yellow with many toothed ragged keels. Nice plant, 7 bulbs, 1 young growth	15	15	0

2898		Phaius COOKSONII (<i>P. Wallichii</i> x <i>P. tuberosus</i>). Painting can be seen on application. Fine variety. A very beautiful and highly interesting hybrid, of bold growing habit, producing numerous flowers on an erect scape; sepals and petals are light rose with a shade of yellow, deeper in colour towards the middle; lip broad, oval, and greenish-yellow, the middle lobe crisped and beautifully undulated at the edge; the recurved tips of the side lobes of a deep rosy purple; the apical parts soft rose, spotted with dark rose-purple; throat tawny-yellow. Magnificent plant, 2 old bulbs, 1 with leaves, 1 exceptional strong new growth	6	6	0
2899	„ „	Same variety. Four magnificent plants, 1 very strong flowered growth with leaves, and strong unflowered growth	5	5	0

3021	Sobralia	LUCASIANA. This beautiful variety was awarded a First-class Certificate, June 21st, 1893, when it was much admired. The flowers are similar in size and shape to <i>Sobralia xantholeuca</i> ; sepals and petals white, faintly tinged with rose; the lip is broader and much flatter and of a soft rosy purple, with a yellow throat. Very fine form. Grand plant, 5 flowered stems and 9 strong unflowered stems	6	6	0
3022	„	macrantha. Very good plant, 18 clean, unflowered, healthy stems	1	1	0
3023	„	„ Strong plant, 8 clean unflowered stem	0	7	6
3024	SOPHRO - CATTLEYA	CHAMBERLAINIANA (<i>Catt. Harrisonia</i> x <i>Sop. grandiflora</i>). A good description of this beautiful hybrid is given in the September number (1898) "Orchid Review," page 270. The flower shows much of the character of <i>C. Harrisonia</i> in the sepals and petals, the colour, however, being modified to clear, deep, brilliant, rose-purple, which also extends to the front lobe of the lip, and round the margin of the side lobes. The disc and throat are bright yellow, passing to white towards the base. In shape the lip shows a good deal of the <i>Sophronites</i> character. It is a brilliantly coloured and very charming little plant. Grand plant, 7 fine bulbs, 5 with leaves, longest bulb and leaf, measuring 5 $\frac{1}{4}$ inches			8	8	0
3025	„	„ Very good plant, 5 bulbs, all leaved, longest bulb and leaf 4 inches	6	6	0
3026	„	MARRIOTTIANA (<i>L. flava</i> x <i>Sop.-grandiflora</i>). Painting can be seen on application. An exceedingly pretty little hybrid, partaking of the beauties of both parents in a most effective manner; intermediate in shape; the colour is orange-red, deeply suffused with crimson; lip is yellow towards the base, heavily suffused with crimson on the upper parts and front lobe. Healthy plant, with 4 bulbs, 3 with leaves, longest bulb and leaf 4 inches, making strong new growth	6	6	0
3027	„	„ Healthy plant, 3 bulbs, all with leaves, longest bulb and leaf 3 inches, making strong new growth	5	5	0

The following are a grand lot of plants in the finest possible condition, having been imported two years, and are thoroughly established. They are the fine large-flowered brilliant type.

3131	„ O'BRIENIANUM (LEHMANN).	New Species. This is the only plant known to exist in this country. A fine discovery of Mr. F. C. Lehmann who named the species, but out of the three or four specimens which he found only succeeded in getting this one over alive. It is unlike any other species in cultivation, but probably of the <i>Zygopetalum grandiflorum</i> section. The fragrant flowers, which are borne on upright spikes, has the sepals and petals suffused with light purple and the labellum white. Good plant, 4 fine bulbs, 2 with leaves, and 1 strong new growth...	6	6	0

LIST OF SUNDRIES.

THE following Articles are all of the finest quality, and we can highly recommend them; having used them ourselves for a number of years, we can testify to their being absolutely indispensable for the good cultivation of Orchids.

Selected ORCHID PEAT, exceedingly fibrous, from the best Hampshire grounds, 10/6 per Sack.

Finest DUST PEAT for Rhododendrons, 2/6 per Sack.

SELECTED SPHAGNUM MOSS, Thick-headed and Green, the best Moss obtainable, 3/6 per Bushel; 10/- per Sack.

FINEST LUMP CHARCOAL, 2/6 per Bushel.

THE WEST PATENT TEAK BASKETS, well recommended.

Complete with Copper Wire Improved Patent Suspenders.

4 inch, 3/6 per 100; 5 inch, 4/- per 100; 6 inch, 5/- per 100.

LATH ROLLER BLINDS (Our own manufacture).

They are neat in appearance, and whilst admitting the requisite amount of light, form the most effective shading possible. Further, they afford an excellent protection against frost during the severe weather. We have supplied several of the leading Orchid establishments with these blinds which have given every satisfaction. We have had them in use ourselves for several years and calculate that these blinds have saved us 50 per cent. in canvas shading formerly used.

As we have considerably improved our plant for this work we can now offer them at **1/9** per square yard **unpainted**

We shall be pleased to give further particulars on application.

THE XL ALL VAPOURISING FUMIGATOR.

The safest and most effectual method of Fumigating Orchid Houses.

No. 1 Set.—Containing 1 bottle of Compound for 40,000 cubic feet and 3 Fumigators complete							30/6
No. 2 Set.—Containing 1 bottle of Compound for 20,000 cubic feet and 2 Fumigators complete							17/6
No. 3 Set.—Containing 1 bottle of Compound for 10,000 cubic feet and 1 Fumigator complete							9/-
No. 4 Set.—Containing 1 bottle of Compound for 5,000 feet and Fumigator complete							5/9

The Compound for Vapourising is also supplied in Capsuled Bottles at the following prices:—

No. 1 Bottle, containing sufficient Compound for 40,000 Cubic Feet							24/-
